マンゴー産地で新式の処理装置、輸出増に期待

農水 2023年6月9日

台湾行政院（内閣）農業委員会（農委会）の陳吉仲主任委員（閣僚級）は7日、マンゴーの産地である台南市玉井区にある蒸気熱処理施設で、新設備や今年のマンゴーの生産状況などをメディアに向けて紹介した。新設備により処理時間の短縮や良品率の向上といった効果が上がっており、今年のマンゴー輸出は増加するとの期待を示した。

農委会が同日発表したところによると、玉井の蒸気熱処理施設は2005年に稼働を開始し、処理能力8トンの設備を運用していたが、老朽化が進んでいた。台南市政府は農委会からの補助を受け、新たに処理能力5トンの設備2台を導入し、今年運用を開始した。処理時間は1時間半に短縮し、年間の処理量は最大800トンに拡大。良品率も100%近くに向上した。またマンゴーの消費期限は従来の8日間から14日間に延びた。

農委会は近年、コールドチェーン（低温物流）網の整備を進めており、マンゴーの蒸気熱処理施設の更新や改造もその一環。玉井の施設の隣接地では、農産品の加工・コールドチェーンセンターの建設を進めており、24年5月の完工を見込んでいる。

New processing equipment in mango production area, expected to increase exports.

Taiwan Executive Yuan (Cabinet) Agricultural Commissioner Mr. Chen (Minister-level) said on the 7th that he has installed new equipment and this year's mango production at a Vapor Heat treatment facility in Tainan City, which is a mango-producing area. He introduced the production status to the media. The new equipment has had the effect of shortening the processing time and improving the rate of non-defective products, and he expects mango exports to increase this year.

According to the Agricultural Committee's announcement on the same day, Tamai's VHT facility started operation in 2005 and had a processing capacity of 8 tons, but it was aging. The Tainan city government received subsidies from the agricultural committee and introduced two new equipment with a processing capacity of 5 tons, which went into operation this year. The processing time has been shortened by an hour and a half, and the annual processing volume has expanded to a maximum of 800 tons. The non-defective product rate has also improved to nearly 100%. The expiry date for mangoes has also been extended from 8 days to 14 days.

In recent years, the Agricultural Committee has been promoting the development of a cold chain (low-temperature distribution) network, including the renewal and modification of Vapor heat treatment facilities for mangoes. On the land adjacent to the Tamai facility, construction of an agricultural product processing and cold chain center is underway, and construction is expected to be completed in May 2024.
